Product Designer with **5+ years** of research-driven UX experience across B2B services, healthcare, and fintech, creating **inclusive designs** and integrating **AI into UX engineering** to deliver data-driven, human-centered solutions.

EXPERIENCE

Product Design Engineer | Apex Fintech Solutions

Feb.2026 - Present

- Architected 3 fintech platforms across billing, trading, and account onboarding, shaping complex fintech workflow into intuitive production-ready web, mobile and internal interfaces; operationalized **AI-driven workflow** to deliver **\$1.2M+** in annual savings.
 - Iterated product experiences using qualitative research and behavioral analytics (Datadog, session replay tools, success metrics), improving usability and driving measurable business outcomes.
- Designed front-end applications and prototypes using **React, TypeScript, and HTML/CSS** with Claude Code and GitHub, reducing engineering effort by **98%** (from 60 days to 1day) through code-ready UI delivery.
 - Established **AI-augmented design documentation** and reusable interaction patterns, governing a component library, compressing concept-to-prototype cycles across **2,300+** iterations.
 - Partnered closely with PMs and engineers to define technical feasibility and specs, ensuring implementation fidelity across high-risk financial workflows.

UX Designer | Eli Lilly

Nov.2025 – Feb.2026

- Designed an internal FDA-regulated clinical trial platform in Figma, improving operational efficiency by introducing **AI-first product experiences**, including automated workflows and predictive interfaces.
- Conducted moderated usability testing with internal stakeholders, analyzing task completion, time-on-task, and post-task surveys and iterate protocol management designs, reducing manual data entry by **38%**, improving protocol adherence by **43%**, and accelerating workflow completion by **70%**.

Product Designer | HealthAI Lab, UT-Austin

Jan.2024 - Aug.2025

- Led end-to-end design of an **AI conversation agent**, synthesizing insights from 10 diary studies into personas, wireframes, and prototypes that reduced task completion time by **33%** and increased completion rates by **18%**.
- Synthesized insights from 10 diary studies using affinity mapping and personas to surface user emotional and informational needs, reducing user confusion by **22%** through progressive disclosure and tone of voice.

Sr Associate UX Design Intern | AT&T, Inc

June.2024 - Aug.2024

- Redesigned an internal portal, reducing navigation time by **30%** and improving user efficiency by **12%** through **AI automation**, streamlined workflows, and accessible dashboards, search, and UI components.

UX Designer | Whole Communities Whole Health

Sep.2023 - June.2024

- Designed a mobile health app, improving report readability and comprehension by **25%**.

EDUCATION

MS, Information Science (UX Design) | GPA 3.96

Honor: Sam G. Whitten Memorial Endowed Presidential Scholarship

The University of Texas at Austin

Aug.2023 - Aug.2025

BS, Human-Computer Interaction | GPA 3.9

Honor: The 5th Yi-Lin NTU Talent Cultivation Program Scholarship

Radboud University, Netherlands

Sep.2022 - June.2023

BS, Japanese Language & Library and Information Science | GPA 3.98

Honor: Student Altruism Award

National Taiwan University, Taiwan

Sep.2018 - June.2023

SKILLS

Design & Research: Wireframe, Prototype, Persona, Journey Map, Story Board, Interaction/Visual Design, Heuristic Evaluation, Survey, Interview, Card Sorting, Usability Testing

Tools: Figma, Sketch, Miro, Jira, Tableau, SQL, RStudio, Python, HTML, CSS, JavaScript, React, C++, Power BI

Soft Skills: Problem-solving, Collaboration Skills, Critical Thinking, Decision-Making, Able to Work Independently

Languages: English, Mandarin Chinese, Japanese
