Chieh-Ru (Jenny) Lin

Portfolio ✦ **LinkedIn** ✦ United States ✦ (512) 287-0645 ✦ jennycrlin.work@gmail.com

Product Designer with **5+ years** of research-driven UX experience across B2B services, healthcare, and fintech, creating inclusive designs and integrating **AI** into UX engineering to deliver data-driven, human-centered solutions.

EXPERIENCE

Product Design Engineer | Apex Fintech Solutions
Feb. 2026 – Present

- Architected a risk engine — monitoring **$250B+** in assets across Portfolio Margin, Eq Scan, and real-time risk alerting — into production-ready web, mobile, and internal interfaces; operationalized **AI**-driven workflow via qualitative research and behavioral analytics (Datadog, session replay).
- Designed workflows across billing, trading, and account onboarding for financial advisors opening accounts daily, building bulk upload, inline validation, and auto-populated fields to cut repetitive data entry across related accounts.
- Built a single source of truth across 3 fintech platforms, unifying two incompatible component libraries into a single design system via shared design tokens and business-logic features; compressed build timelines from **~4 months to under 1 month** and validated light/dark mode contrast against WCAG standards.
- Built an **AI**-augmented design workflow inside Claude Code, using only synthetic mock data to safeguard security, designing and prototyping in React, TypeScript, and a GraphQL API with GitHub. Auto-deployed PR preview links eliminated an est. **~25 hours/month** of local dev setup across a 10-PM team.
- Led and mentored a cross-functional team of designers, PMs, and engineers — including working sessions to decide component standardization per platform's functional needs — and presented design rationale and roadmap trade-offs to leadership within Agile/sprint cadences.

UX Designer | Eli Lilly
Nov. 2025 – Feb. 2026

- Designed within a regulated (FDA-compliant) clinical trial platform in Figma, applying compliance and audit-trail requirements to interface and workflow decisions and validating the color palette against WCAG 2.2 AA contrast standards, while introducing **AI**-first product experiences, including automated workflows and predictive interfaces.
- Facilitated a 2-day workshop (focus groups) with 6 cross-functional stakeholder groups, building personas and journey maps around medical writers' pain points to turn research insights into practical, informed decisions for a digital collaboration platform.
- Conducted moderated usability testing with internal stakeholders, analyzing task completion, time-on-task, and post-task surveys and iterate protocol management designs, reducing manual data entry by **38%**, improving protocol adherence by **43%**, and accelerating workflow completion by **70%**.

Product Designer | HealthAI Lab, UT-Austin
Jan. 2024 – Aug. 2025

- Led end-to-end design of an **AI** conversation agent, synthesizing insights from 10 diary studies into personas, wireframes, and prototypes that reduced task completion time by **33%** and increased completion rates by **18%**.
- Synthesized insights from 10 diary studies using affinity mapping and personas to surface user emotional and informational needs, reducing user confusion by **22%** through progressive disclosure and tone of voice.
- Applied accessibility heuristics (e.g., WCAG contrast and readability guidelines) when designing conversational UI for a general-population user base.
- Mentored junior researchers/designers on diary-study synthesis and affinity mapping.

Sr Associate UX Design Intern | AT&T, Inc
June 2024 – Aug. 2024

- Redesigned an internal portal dashboard, reducing navigation time by **30%** and improving user efficiency by **12%** through **AI** automation, streamlined workflows, and accessible search and UI components.

UX Designer | Whole Communities Whole Health
Sep. 2023 – June 2024

- Designed a mobile health app — including an optional embedded video guide for visual learners and iterative refinement of data-visualization density and interaction patterns — improving report readability and comprehension by **25%**.

EDUCATION

MS, Information Science (UX Design) | GPA 3.96 — The University of Texas at Austin Aug. 2023 – Aug. 2025
Honor: Sam G. Whitten Memorial Endowed Presidential Scholarship

BS, Human-Computer Interaction | GPA 3.9 — Radboud University, Netherlands Sep. 2022 – June 2023
Honor: The 5th Yi-Lin NTU Talent Cultivation Program Scholarship

BS, Japanese Language & Library and Information Science | GPA 3.98 — National Taiwan University, Taiwan Sep. 2018 – June 2023
Honor: Student Altruism Award

SKILLS

Design & Research: Wireframe, Prototype, Persona, Journey Map, Story Board, Interaction/Visual Design, Design Systems, Accessibility (WCAG), Heuristic Evaluation, Survey, Interview, Card Sorting, Usability Testing

Tools: Figma, Figma Make, Sketch, Miro, Jira, Confluence, Agile/Scrum, MCP, Tableau, SQL, RStudio, Python, HTML, CSS, JavaScript, React, C++, Power BI

Soft Skills: Problem-solving, Collaboration Skills, Critical Thinking, Decision-Making, Able to Work Independently

Languages: English, Mandarin Chinese, Japanese
